

Recommendation Letter

Professor of Computer Engineering
CEFET/RJ – Centro Federal de Educação Tecnológica Celso Suckow da Fonseca
laura.assis@cefet-rj.br
July 2025

To Whom It May Concern,

I am pleased to write this letter of recommendation for Pedro Carneiro Pizzi, a student in the Computer Engineering program at CEFET/RJ. I have had the opportunity to teach him in two courses: Algorithms and Data Structures and Linear Programming, and I can attest his academic ability.

Throughout the courses, Pedro consistently demonstrated a grasp of complex theoretical concepts and showed excellent problem-solving skills. His performance was notably above average, and he often engaged in class discussions with some contributions. More importantly, he exhibited qualities that go beyond academic performance—he is assiduous, committed, and hard-working.

Pedro maintained excellent attendance and was always punctual and prepared. He consistently met deadlines, participated actively in practical assignments, and showed a genuine interest in deepening his understanding of the subject matter.

In summary, I highly recommend Pedro for any academic or professional opportunity he seeks to pursue. I am confident that he will continue to excel and be a valuable asset in any environment he chooses to be part of.

Please feel free to contact me if you require any further information.

Sincerely,
Laura Assis
Professor – CEFET/RJ
