Professional Summary

I have **five years** of professional experience, and **four** as a software developer. I worked for one year at **Orange Business Services** with an American team in the networking area. At **Advice Compliance Solutions**, I worked as a developer and closely followed several compliance-related projects. At **GE Aerospace, I rewrote the backend of a system with over a thousand users using a new technology**, focusing on clean, clear, and well-documented code. **I reduced the number of security vulnerabilities from 800 to 0 and turned the project into a global tool. Accepted for a 6 month academic exchange at the University of Valladolid, Spain.**

GE Aerospace – Full Stack Developer
May 2025 – August 2025

- **Full stack system development** with NestJS, Vue.js and Python**, focused on scalability, performance, efficiency, and security, contributing from architecture design to production deployment**

- **Continuous improvements**, application security, **proactive maintenance**, **solution architecture**, and advanced data management with PostgreSQL and **SAP HANA**

GE Aerospace – Full Stack Development
April 2023 – April 2025

Advice Compliance Solutions – C# Development
December 2021 – January 2023

- **Implemented RESTful APIs** in C# and .NET with SQL Server database integration, optimizing compliance processes for corporate clients, developed new features using JavaScript and APIs.

Orange Business Services – Local Delivery Manager Intern - North America
November 2020 – November 2021

- Managed orders and network implementation projects **for the North American region, collaborating with an international team**
